

## Resources available for the Section for Residents and Fellows

**Academic Bowl** – Our annual Academic Bowl, now in its 4<sup>th</sup> year, pits four of the top otolaryngology programs against each other and the audience in a test of clinical knowledge. Come by immediately following the Opening Ceremony on Sunday of the Annual Meeting & OTO EXPO.

**AcademyU** – AcademyU is the Academy's online learning system, providing AAO-HNSF members with over 70 free CME courses, AAO-HNSF leadership development training, Coding courses, and access to up-to-date practice guidelines and policy statements. Members can register and take courses for free at <http://www.entnet.org/EducationAndResearch/academyu.cfm>.

### **Annual Meeting** –

The world's largest gathering of otolaryngologists, the AAO-HNSF Annual Meeting & OTO EXPO will be held in historic Boston, MA, September 26-29, 2010, at the Boston Convention and Exhibition Center. The event, which is expected to bring together 9,000-plus attendees and more than 300 exhibiting companies, promises to help attendees challenge their limits and increase their performance.

**COOL** – Clinical Otolaryngology OnLine (COOL) Cases are interactive patient scenarios that make use of the latest e-learning technology to prepare the learner for a variety of common otolaryngologic situations. Each case is written and peer reviewed by some of the most important figures in otolaryngology. COOL is an excellent resource for residents and anyone else who encounters otolaryngologic symptoms.

**COCLIA** - Comprehensive Otolaryngologic Curriculum Learning through Interactive Approach (COCLIA) is a teaching tool to help residents learn otolaryngology-head and neck surgery. This document provides discussion questions for over 100 major otolaryngology topics. Residents meet weekly to review the questions and learn from each other. COCLIA is an excellent resource to start your own journal club and prepare for the Otolaryngology Training Exam.

**ENT ImageViewer** - This application provides access to 700+ otolaryngology-head and neck surgery related images via a simple search. Images have accompanying notes and annotations when available and new images are added when received.

<http://www.entnet.org/EducationAndResearch/imageviewer.cfm>

**Home Study Course** – The Home Study Course is an enduring continuing medical education activity. It spans a two year period covering eight clinical areas. Each section is comprised of article reprints, a self-assessment examination, and as an additional learning tool, a faculty symposium (comments/rationale from the expert faculty for correct self-assessment questions and answers).

**OOSG** - The Otolaryngology Online Study Guide (OOSG) is designed using an active learning approach. It lists specific learning objectives and references to focus the learner's studies. Modules are not designed to present answers. The purpose of the study guide is to enable the learner to take an active role by seeking out the answer to each objective. OOSG is an excellent preparation for the Otolaryngology Training Exam and later, Maintenance of Certification.

**Primary Care Otolaryngology and Geriatric Care Otolaryngology** – Primary Care Otolaryngology and its follow-up, Geriatric Care Otolaryngology provide concise, informative information on a full range of otolaryngology topics. Both books are available free online. Look for a new edition of Primary Care Otolaryngology in early 2011.
